Heavy-duty cartoner

Posted by Lisa McTigue Pierce, Executive Editor -- Packaging Digest, 4/5/2013 1:42:38 PM

The Heavy Duty Linear Servopack (HD-LSP) autoloader cartoner can handle bars, flow wrap packages and sachets. The machine can handle more than 350 products per minute, incorporating the patent-pending Sure-Load carton closing system, a rail system that keeps products from falling out of the carton during closing operation. HD-LSP features an infeed system that offers quick changeover for different pack patterns, accurate feedback and diagnostics, and a high packing speed, according to the manufacturer. The cartoner also features a SUBO end-of-arm tool to pick multiple products from buckets and groups and expands to distribute the product layer on the specified pitch.
